

INDICATIONS: Veterinus Derma GeL[®] is an isotonic hydrogel indicated for intensive skin care. Veterinus Derma GeL[®] provides a barrier to moisturize and to protect against foreign contaminants. Bandaging the area is therefore not required. Certified non-mutagenic and devoid of cytogenotoxicity or irritating and sensitizing effect on epithelial cells, Veterinus Derma GeL[®] favors hair regrowth in the original color.

DIRECTIONS: Daily cleanse the affected area with warm water or a saline solution, so as to preserve epithelial cells from irritation. Apply Veterinus Derma GeL[®] generously two or three times a day, as needed. To help prevent skin proliferation, extend application to the surrounding area.
