

So-Kalm Plus

All horses have some degree of nervousness while being prepared for and during exercise or competition. Some are so highly strung that they "wash-out" before competition, stopping them from giving their best. So-Kalm Plus will relax your horse without removing the "edge" required for competition, using natural amino acids and Vitamin B1, which have long been recognised as effective relaxants.

Key ingredients

- L – Tryptophan
- Thiamine (Vitamin B-1)

Available in 908gms and Paste (3 x 10ml). Feed 28gms of the Powder daily, supplemented by an additional serving prior to exercise or competition.

Apple Lytes

THE Electrolyte for your horse or pony.

A special preparation of micro blended, fruit flavoured mineral salts to assist re-hydration and replenish vital body fluids and electrolytes after strenuous exercise. Apple Lytes is highly soluble and can be given in the water or included in the feed.

Key ingredients

- Salt
- Potassium Chloride
- Magnesium Sulphate
- Calcium Lactate

Available in 1.8kgs (Approx 1 months supply), 6.8kgs (Approx 3 months supply), and 13.6kgs (Approx 8 months supply) and paste.

HerBolic

A powerful, fast acting herbal supplement, for horses needing to achieve their highest performance level. HerBolic encourages appetite and healthy muscle tone, with resultant benefits to the horses attitude and keenness to compete.

Key ingredients

- Vitamin B12 • Ribose
- Passiflora Caerula
- Puncture Vine Root • Rutin

Available in 946ml (Approx 2 months maintenance supply).

Sand-Out

A digestive aid for horses and ponies grazing on sandy pastures. Sand-Out contains multi-active fibre that encapsulates dirt and sand, supported by effective system lubricants, helping it to pass through the digestive system. Sand-Out is non-abrasive and gentle on the system and assists normal digestive activity. Key ingredients are Psyllium Seed Husk and Cane Molasses.

Available in 1.3kgs (1 month course), Larger sizes available on request.

Bleader Gard

Bleader Gard helps to maintain the vital respiratory and circulatory organs, and support the optimal capability required in strenuous exercise, whether in short bursts or over longer periods of time. Without Bleader Gard, performance can be badly affected.

Key ingredients

- Arnica Montana
- Cinchona Officinalise

Bleader Gard is available in a paste (3 x 10ml) for pre-competition support, and in a powder for regular usage - 908gms (Approx 2 months supply).

U-Gard Plus

A calcium based supplement containing neutralising alkaline agents to gently soothe and coat the stomach lining, making it ideal for the horse with a sensitive stomach. Found to be the most effective and affordable alternative to Gastrogard by the Horse Journal (2000).

Key ingredients

- Calcium Carbonate
- Kaolin
- Aluminium Calcium Silicate (an organic source)
- Iron Oxide
- Dried Apple Pectin Pulp
- Magnesium Silicate
- Methylcellulose

Available in 1.8gms (Approx 1 months supply).

"My top filly has trained and raced superbly since the addition of U-Gard to her feeding regimen"

Michael Dickinson, Thoroughbred Trainer
